. Charles E. Van Horn, Esq.  
Director, Patent Examining Group 120  
U.S. Patent and Trademark Office  
Washington, DC 20231

Dear Mr. Van Horn:

This is in regard to the application for patent extension for U.S. Patent 4,215,215 filed by Hoffmann-LaRoche, Inc. under 35 U.S.C. 156. The human drug product claimed by the patent is Tegison (etretinate), New Drug Application number 19-369.

In the February 5, 1987 issue of the Federal Register, the Food and Drug Administration published its determination of the product's regulatory review period, as required under 35 U.S.C. 156(d)(2)(A). That notice provided that on or before August 4, 1987, 180 days after the publication of the determination, any interested person could file a petition with FDA under 35 U.S.C. 156(d)(2)(B)(i) for a determination of whether the patent extension applicant acted with due diligence during the regulatory review period.

The 180-day period for filing a due diligence petition pursuant to the notice regarding Tegison has expired, and FDA has received no such petition. FDA, therefore, considers its determination of the regulatory review period for Tegison to be final.

Please let me know if we can provide further assistance.

Sincerely yours,

Ronald L. Wilson  
Director  
Health Assessment Policy Staff  
Office of Health Affairs
